

SUMMARY OF COMMITTEE INFORMATION REQUESTS

Questions from members of the committee for the dialysis tech applicant group:

Where do dialysis services fit in the overall context of the health care delivery system of a hospital?

How would the proposal be administered and what body would do this?

A committee member requested that the minutes of Board of Nursing meetings in which dialysis techs have been discussed be provided.

The committee members requested that staff ask the Board of Nursing to make one of their members available at the next committee meeting on this proposal to answer questions about this Board's 'retirement' of the advisory opinion on dialysis techs.

A committee member asked the applicants to revise their appended tables so as to include more states than just those whose laws match Nebraska's laws.

This committee member would like to be provided with a set of states whose laws resemble the type of law the applicant group is seeking to establish in Nebraska.

A committee member asked the applicants to provide a table comparing the range of functions of a 'med aide' and the proposed range of functions of a dialysis tech.
